TRADE COOPERATION BRIEF

A cooperation framework to connect buyers with Vietnamese tea

Hoàng Long proposes working with trade-promotion bodies and commercial partners on a programme organised by product group and sales channel. The focus is to connect suitable buyers, assess supply fit and prepare a commercially grounded trial transaction, expanding when the product and supply approach have demonstrated market acceptance.

MEETING OBJECTIVE

Turn a Vietnamese tea introduction into a procurement opportunity that can be pursued: identify the partner, suitable products, market-entry requirements and each party's implementation responsibilities.

HOÀNG LONG'S CONTRIBUTION

01 **Production and an origin-based working relationship**

Processing at Tân Lập, Hà Giang, and family tea-selection and tea-making experience since 1995. Hoàng Long prepares product proposals, evaluation samples and a site-visit agenda around the buyer's objectives.

02 **A range for different business models**

Green, black, scented and selected teas for beverage ingredients, distribution and specialist tea businesses. Each proposal distinguishes the product's origin, grade, packing and available supporting records.

03 **A contact responsible for follow-through**

The Director of Export Development coordinates requirements, samples and commercial proposals. Hoàng Long and the partner agree the next action, responsible contact and response milestone so opportunities continue beyond the meeting.

These are proposed areas for discussion, not signed projects, commitments of support or endorsement by a public authority.

TRADE COOPERATION BRIEF / 02

Proposed connections & support

01 Introduce buyers with a relevant procurement need

Connect importers, distributors, F&B businesses or specialist tea companies with defined channels and buying requirements. Prioritise meetings with advance information on tea groups, applications, price segment and expected volume.

02 Clarify market-entry requirements

Discuss destination-market specifications, labelling, import requirements and trading practices. Identify issues requiring suitably qualified technical or assessment support before a formal proposal is issued.

03 Organise a trial with clear responsibilities

Agree the samples, evaluation approach and feedback schedule; arrange a factory visit where relevant. If the criteria are met, the businesses proceed to negotiate a trial lot, commercial terms and subsequent procurement.

PROPOSED PATHWAY

01

Define the brief

Select the market, buyer group, products and contacts. Agree what to prepare for the business meeting.

02

Evaluate the fit

Assess samples, applications and technical requirements. Record results and any gaps requiring further work.

03

Develop the transaction

Propose a trial lot: price, volume, packing, records and timing. Expand according to actual transaction results.

INTENDED WORKING OUTCOME

Intended outcome: relevant opportunities, responsible contacts, sample feedback and a commercial next step — a basis for pursuing transactions and assessing the value of the introductions.
