CORPORATE PROFILE

HÀ GIANG · VIETNAM

A production base. A direction for market development.

Vietnamese tea can serve beverage ingredients, distributor ranges and distinctive drinking teas. To turn that potential into business, buyers need more than an origin story: they need to select the right product, understand its use, evaluate quality and plan repeat procurement. Hoàng Long connects tea-making experience, processing in Hà Giang and a commercial point of contact around one task: translating the character of tea at origin into a supply proposal suited to its market.

01 / TEA ORIGINS & COMMERCIAL ROLE

Rooted in tea-making. Developed around the buyer.

Hoàng Long draws on family tea-making experience developed since 1995. Processing at Tân Lập, Hà Giang connects with Northwest Vietnam's highland tea and the Vietnamese tea lines in the range. Building on that base, the direction is to select grades, processing approaches and formats for each partner's business use: a beverage base, a distribution line or a drinking tea with a distinctive character.

RESPONSIBILITIES IN A SUPPLY PROGRAMME

01

Origin is the starting point for the product

Raw-material region, season and leaf form shape appearance, aroma and flavour structure. Procurement discussions must translate those characteristics into criteria that can be evaluated in a sample, beverage recipe or distribution range.

02

Production and selection support the range

Alongside its manufactured lines, Hoàng Long supplies selected teas for different needs. Origin, processing source and supporting records are confirmed by product, giving buyers a clear basis for evaluation.

Northwest Vietnam's highland tea, including Hà Giang, underpins Hoàng Long's Vietnamese tea lines. Raw-material character creates value when selection and processing serve a defined purpose: preserving distinction for tea drinkers or providing a suitable base for beverage recipes and distribution.

02 / PRODUCTION & SUPPLY BASIS

Capability in the context of a defined supply plan.

These facts provide a basis for initial discussions. Execution must account for tea family, grade, season, available stock and production scheduling. Deliverable volume, timing and each party's responsibilities are confirmed in the quotation and order documents.

INDICATIVE PRODUCTION CAPACITY

50–100 tonnes/month

Declared by Hoàng Long. Product mix and available timing are coordinated against the production plan and individual orders.

PROCESSING & EXW COLLECTION

Tân Lập · Hà Giang

Collection at Hoàng Long Tea Factory. Responsibilities for loading, transport and formalities are set out in the transaction documents.

LARGE-BULK / EXPORT FORMATS

PP/PE sacks · 20 / 30 / 35 kg

Selected for leaf form and intended use; material, net weight and labels are confirmed per order. Separate from retail formats.

INDICATIVE TRANSACTION TIMELINE

2–8 weeks

Includes transit time and excludes unforeseen delays. Timing and delivery costs are agreed separately for the volume, destination and EXW terms.

Factory · Tân Lập, Hà Giang

Capacity and locations reflect information supplied by Hoàng Long. Production plans, stock availability and the scope of each product must be confirmed for the specific programme.

03 / PRODUCTS & APPLICATIONS

A range for three market briefs.

Hoàng Long starts with how the partner will use and distribute tea, then selects the product, grade and packing. The separate reference catalogue provides the detailed range and individual product information.

01 Beverage ingredients

Green, black and scented teas for F&B businesses and ingredient suppliers. Evaluate them in the actual recipe: flavour base, compatibility, dosage and cost per serving. Current export offers include steamed green tea, smoky black tea, OP1 black tea and magnolia green tea.

02 Import and distribution

Build a range by price segment, appearance and flavour for importers, wholesalers and specialist tea businesses. Connect reference samples with bulk packing, origin information, destination-market requirements and procurement timing, rather than comparing price per kilogram alone.

03 Drinking tea and gifting

Shan, scented and selected teas from the current range. Emphasise flavour distinction, product presentation and formats suited to the consumer. Manufacturing origin, traded origin and information for each tea are confirmed individually.

Product photographs from the Hoàng Long range

PP/PE sacks · 20 / 30 / 35 kg

For large-bulk and export orders, adjusted to tea form and application. Separate from retail pack formats.

04 / COMMERCIAL EXECUTION & DELIVERY

From the market brief to repeat procurement.

Four proposed working stages help both parties make decisions against the same information. Each stage should produce a clear output before an introduction becomes a commercial commitment.

01 Market brief & sample selection

Define the buyer, channel, application, price range and expected volume. Hoàng Long proposes suitable tea groups and samples; both parties record the technical or import questions to resolve.

02 Evaluation & acceptance criteria

Test samples under the partner's actual conditions of use; record the grade, sensory criteria and specification requirements. Define any testing or factory-assessment scope around the product and procurement objectives.

03 Quotation & lot preparation

Agree product, volume, packing, labels, price, payment and records. Confirm goods-readiness milestones, delivery terms and responsibility for loading, transport and formalities, using the agreed sample and requirements as the reference.

04 Delivery & subsequent business

Reconcile delivered volume, goods condition and documents against the order. Review application feedback, issues requiring resolution and future needs to adjust the product mix or repeat-supply schedule.

INDICATIVE TRANSACTION WINDOW

2–8 weeks

Includes transport time and excludes unforeseen delays. Transport arrangements, responsibilities and milestones are agreed separately; EXW pricing does not imply freight is included.

05 / QUALITY & SUPPORTING RECORDS

Evidence at the level of the product and lot.

Hoàng Long proposes a working file with three layers: the reference sample, technical requirements and delivery information. Testing or certification is assessed for the specific market, product, lot and date. The framework below helps both parties define the records to prepare and the criteria supporting a procurement decision.

01 Samples & product requirements

Identify the tea line, grade and selected sample; record leaf appearance, aroma, liquor colour, taste and evaluation method. For beverage use, retain recipe and brewing conditions for comparable feedback. Agree technical parameters, acceptance limits and evaluation methods before ordering.

02 Records & assessment at origin

Review company identity, processing steps and actual photographs relevant to the product. Where testing is required, define parameters, laboratory, sampling date, costs and responsibilities. Test results or certificates apply only within the scope stated in the document.

03 Lot identity & delivery conditions

Review lot identification, weight, sack type, labels, storage and goods condition. Establish the records applicable to the transaction: contract, invoice, packing list, transport, origin or other documents where needed. Customer-sensitive records are shared privately within the permitted scope.

Packing & handover

The document scope, signing authority and execution responsibilities are reviewed before a transaction is agreed. Records containing customer information are shared privately within the authorised scope.

06 / COOPERATION PROGRAMME

A cooperation direction built for lasting value.

Hoàng Long seeks relationships with clear commercial roles: producers understand market requirements, buyers obtain suitable products, and trade-promotion bodies enable relevant dialogue. The following cooperation directions are proposed for partners to select and develop into an agreed working programme.

PROPOSAL FOR DISCUSSION

01 Develop ranges with a market rationale

Use buyer feedback to select tea groups, applications and segments; assess origin character alongside application performance and trading conditions. Prioritise product fit over adding more products for its own sake.

02 Strengthen the basis for repeat supply

Clarify samples, packing, records and procurement cycles. Bring the results of one lot into planning the next. The aim is to narrow the gap between a successful trial and an ongoing buying relationship.

03 Build connections around implementation results

Work with associations, trade-promotion bodies and commercial partners on a specific brief. Track sample evaluation, information gaps and commercial next steps; use actual results to decide whether to expand.

INTENDED WORKING OUTCOME

Intended outcome: relevant opportunities, responsible contacts, sample feedback and a commercial next step — a basis for pursuing transactions and assessing the value of the introductions.

These are proposed areas for discussion, not signed projects, commitments of support or endorsement by a public authority.

07 / WORKING CONTACT

A point of contact beyond the meeting.

Anh Long leads market development, partner connections and the coordination of export cooperation enquiries. To prepare a relevant discussion, partners can share their objectives, market or distribution channel, tea interests and proposed schedule. Hoàng Long and the partner then define the sample-evaluation scope, records for review and an appropriate next step. Signing authority and the power to make commitments are confirmed in the transaction documents.

RECORDS FOR DUE DILIGENCE

01 Entity & responsible contacts

Company identity, tax number, responsible contacts and transaction authority are reviewed before signing.

02 Production & origins

Actual photographs, processing steps, the basis for volume planning and product-origin information relevant to the assessment.

03 Products & quality

Samples, specifications and any available test results, with their date, lot and applicable scope.

04 Delivery experience

Completed-shipment records, transport documents or delivery acknowledgements where disclosure is permitted; customer information is not published automatically.
